November 2, 2011

Greetings,

For those of you who don't know me, my name is Jim Borte and I serve as the Target Zero DUI/Traffic Safety Task Force Coordinator for Clallam County. I am writing to share information about a great database that was recently designed for our DUI Victims Impact Panel and Traffic Safety School Programs. It was developed by Mr. Stan Osterbauer with Daniel Four Software of Port Angeles. We have found the product to be easy to use and very versatile. It meets all of the needs for our programs.

The system provides us with individual records for each person who registers for either the DUI Victims Panel or our Traffic Safety School. It produces various forms, letters and other documents that we share with courts and our clients. It can produce customized sign-in/out sheets, letters of acceptance, completion notices, as well as any other customized documents or reports that you might need. The product also has an early to use and versatile search component. It also has many other features and security safeguards to insure that you can retain all necessary records and information.

Stan can design a database program to meet your specific needs. He is extremely knowledgeable and professional. His extensive background in Information Technology includes 7 years in manufacturing where he developed critical path analysis systems for helicopter manufacturing and developing barcode time cards and a work order tracking system. He also developed animation and early learning software that was bundled for Acer and Compaq computers.

He has more than 15 years in government developing court case management, law enforcement, Information Technology and other database systems. During the past 5 years as the owner of Daniel Four Software, he has developed a number of special products including: law enforcement training calendar system, pay-or-appear tracking system, and an online neighborhood watch (crime prevention) system.

Stan is great to work with. He is also responsive to our requests and because of his wealth of knowledge and experience; he can develop easy to use features and tools to meet your specific needs. His rates are very reasonable, which is extremely important during the challenging economic times in which we live.

Thank you for your time and all that you do to make our communities safer for everyone.

Sincerely yours,

Jim Borte, Project Coordinator

Clallam County DUI/Traffic Safety Task Force
